

The BTCC Racing Drivers choice for Chip Tuning

Are you considering having your car chip tuned or ECU remapped but can't decide who to choose?

Are you looking for a professional reputable company who take pride in the cars they tune and more importantly are UK registered and fully insured?

We'll look no further than **Tune-tec** Automotive Solutions and have your car tuned by the best.

Tune-tec Automotive Solutions are professionals in the Chip Tuning market and not only remap cars such as British Touring Car driver Adam Jones but also all mainstream cars.

Don't take risks with your pride and joy, go for the best and choose Tune-tec today for a quality custom engine remap.

Below are some typical examples of performance gains you can achieve from some of the most popular cars on the market.

<i>Make</i>	<i>Engine</i>	<i>Model</i>	<i>Increase</i>
<i>BMW 5 Series</i>	530 Diesel	170KW	up to 202KW
<i>Mercedes ML Class</i>	320 CDI	165KW	up to 194KW
<i>Range Rover Sport</i>	2.7 TDV6	147KW	up to 169KW
<i>Audi A4</i>	2.0 TDI	103KW	up to 128KW
<i>Vauxhall Astra VXR</i>	2.0 Turbo	174KW	up to 198KW
<i>Ford Focus ST</i>	2.5 Turbo	161KW	up to 194KW
<i>VW Golf V</i>	2.0 T FSi	147KW	up to 176KW
<i>Honda Civic</i>	2.2CTDI	103KW	up to 128KW

Even if your car is not listed in these examples we can still tune all Petrol and Diesel Turbo cars to increase KW and torque up to 45%

Tune-tec will offer 10% discount off standard price upon presentation of this flyer

Note: All Tune-tec engine remaps are direct coding to the ECU and not aftermarket plug in tuning devices that fool the ECU to over fuel the car. These are potentially dangerous and could cause premature damage to your car. Every car we remap has its own custom file written specifically for that car and more importantly it is done on site at the time of the job. Also, every car is diagnostically checked before and after for any errors or faults with dealer level equipment.

For more detailed information and to discuss a price for your exact model please call or email us today or alternatively visit our website for a comprehensive list of Q&A's.
